Dear All,

Every four years, we complete the recertification process to remain a Maryland Green School. We initially achieved this certification in 2011 and it has underpinned the school's commitment to sustainability and educating for sustainability within our curriculum. We have begun the process of recertifying and must complete our work by February 2019.

Our goal this year is to show that we have sustainability instruction in all disciplines and at all grade levels!

The process is a team effort, with the good news that most of the heavy lifting was completed as we updated our Atlas Curriculum Maps! My Sustainability class combed through them last spring and selected several sample assignments for us to share in our reporting. The final piece of help I need on your end is to provide me with evidence that the activity/lesson/plan was completed. **This documentation can come in the form of student work submitted, pictures of your class working, a presentation you designed to support the unit, etc. It must be evidence of implementation, lesson plans are not sufficient.** A list of class, units, and some sample documentation are included in this document:

 [Green School.2018.Sustainability integrated int...](#)

If you have new lessons that aren't included in the above Google Doc, send me a note and we can include them.

If you'd like to help with other parts of the application, please drop me an email!

Thanks,
Emily
